

Special Issue

Advances in Antibiotic and Antifungal Resistance and Related Alternative Therapies, Second Edition

Message from the Guest Editor

Antibiotic and antifungal resistance have become the most important challenges in the field of public health, particularly when treating infections in animals and humans caused by multidrug-resistant strains. This Special Issue is focused on publishing multidisciplinary research that focuses on this complex issue. We encourage the publication of all important and updated results in the fields of food microbiology, antibacterial resistance, antifungal resistance, the characterization of alternative methods, efficient antimicrobial and antifungal agents, and development techniques.

Guest Editor

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
