

Special Issue

Non-Canonical Uses for BCG Vaccine

Message from the Guest Editors

BCG vaccination is being used and studied in a wide variety of human maladies beyond its original purpose: to lessen risk of tuberculosis. BCG is being tested in mycobacterial infection other than TB; moreover, BCG is being studied for diabetes, multiple sclerosis, Alzheimer's disease, and COVID-19. This Special Issue will provide a platform for discussion of BCG and its plausible mechanisms for favorably impacting a variety of infectious, autoimmune, and neurodegenerative diseases.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
