

# Special Issue

## Food- and Waterborne Pathogens: Epidemiology, Genomics, Virulence, and Resistance Profiles

### Message from the Guest Editors

We are pleased to invite you to submit your original research manuscripts to this Special Issue. Food- and water-borne infections cause a major economic burden, having a great impact on food safety, human and animal health worldwide. These infections are widely spread through the consumption of food and/or water contaminated by bacteria or their toxins, parasites, and viruses. This Special Issue aims to better understand the epidemiology, ecology, genomics, virulence, and transmission mechanisms of resistance markers of some of the most important food- and waterborne pathogens, covering the following topics:

- Food- and waterborne bacterial pathogens (*Campylobacter*, *Salmonella*, *Yersinia*, *coli*, *L.monocytogenes*, *Shigella*, *Vibrio*, *S. aureus*, among others);
- Food- and waterborne viral pathogens (Hepatitis A, Norovirus, among others);
- Food- and waterborne parasites (*gondii*, *T.spiralis*, *Cryptosporidium*, among others);
- Virulence factors and mechanisms of infection

### Guest Editors

Dr. Angela Pista

National Reference Laboratory for Gastrointestinal Infections,  
Department of Infectious Diseases, National Institute of Health Doutor  
Ricardo Jorge, Avenida Padre Cruz, Lisbon, Portugal

Dr. Rita Batista

Food Microbiology Laboratory, Food and Nutrition Department, National  
Institute of Health Doutor Ricardo Jorge (INSA), Avenida Padre Cruz,  
1649-016 Lisbon, Portugal

### Deadline for manuscript submissions

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
