

# Special Issue

## ***Bacillus subtilis* as a Model Organism to Study Basic Cell Processes**

### Message from the Guest Editor

This Special Issue will concentrate on advances in basic cell processes studies in model organism *Bacillus subtilis*. This Special Issue will include papers from a number of leading scientists in the field studying bacterial cell division, sporulation, programmed cell death, and biofilm formation in this bacterium and its close relatives. Submissions should include original research articles or comprehensive reviews relating to this Special Issue's focus.

### Guest Editor

Dr. Imrich Barák

Slovak Academy of Sciences, Bratislava, Slovakia

### Deadline for manuscript submissions

closed (31 May 2021)

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
