

## Special Issue

# Chemotherapy of Leishmania and Trypanosoma Infections: Lost in Translation?—2nd Edition

### Message from the Guest Editors

Potential topics for this issue include, but are not restricted to, research papers or reviews on pharmacology-driven selection of molecules for the treatment of *Leishmania* and *Trypanosoma* infections, knowledge of pathophysiology of the diseases and its effect on drug availability and efficacy, improvement of the identification of predictive markers of efficacy, drug delivery systems and their value beyond laboratory, standardization of efficacy trials, relative value of in vitro, ex vivo and in vivo models for drug exploration, impact of microbiome on efficacy, immune modulation to improve drug efficacy, and strategies to minimize drug resistance emergence and extension. Therapy of these life-threatening human and animal diseases is challenging, but the reward is high. I hope you find the topic attractive and that your contribution can help to develop effective and affordable drugs.

### Guest Editors

Prof. Dr. José María Alunda

Department of Animal Health, Faculty of Veterinary Medicine, Universidad Complutense de Madrid, Madrid, Spain

Prof. Juan José Torrado

Pharmaceutics and Food Technology, School of Pharmacy, Complutense University, 28040 Madrid, Spain

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
