

Special Issue

Selected Papers from the 10th European Spores Conference

Message from the Guest Editor

The forthcoming 10th European Spores Conference, to be held in Cambridge, UK, from April 3–5, 2023 (<https://www.sporesconference.co.uk>), will bring together scientists from around the globe to showcase the latest findings associated with both fundamental and applied aspects of bacterial (endo)spore biology. The 10th edition of the conference encompasses a scientific programme spanning the spectrum of Firmicute spore biology, including *Bacillus* and *Clostridial* species as models for studying cell differentiation, spore structure and function, the impact of spores in the food industry, the role of spores in toxigenesis and disease, and applied aspects of spores, including vaccine delivery, diagnostics, and environmental decontamination. This Special Issue is being published in conjunction with the 10th European Spores Conference, and delegates are kindly invited to consider contributing original research articles, short communications, and review articles related to the conference themes.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
