

## Special Issue

# The COVID-19 Pandemic and Bacterial Infections: Microbiological and Clinical Aspects

### Message from the Guest Editors

This Special Issue of *Microorganisms*, “The COVID-19 Pandemic and Bacterial Infections: Microbiological and Clinical Aspects”, is therefore dedicated to addressing these gaps in knowledge. It aims to bring together up-to-date information on all aspects concerning bacterial infections and the COVID-19 pandemic. Topics of particular interest include, but are not limited to, mechanisms of emergence and dissemination of antimicrobial resistance (with particular emphasis on newly introduced drugs) or virulence, biofilm-associated infections, molecular epidemiology of multidrug-resistant organisms and antimicrobial resistances, use of antibiotics in patients with COVID-19, and microbiological and clinical features of difficult-to-treat bacterial co-infections in patients with COVID-19. Papers reporting on original research, comprehensive reviews providing a critical and constructive analysis of the existing literature, as well as short communications and case reports are welcomed. Manuscripts that only deal with clinical management/policy/healthcare will be considered for publication following an evaluation by the

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Virology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
