

Special Issue

***Clostridium difficile* Infection in Clinical Practice: From Bench to Bedside**

Message from the Guest Editors

The aim of this Special Issue is to evaluate the incidence of *C. difficile* infection (CDI) and risk factors in hospitalized patients, considering the length of hospital stays and all-cause in-hospital mortality in the groups of patients with CDI as well as the rate of re-hospitalization and all-cause mortality during follow-up, thus making improvements in the surveillance systems advisable. In addition, microbiological data may be an important supplement to epidemiological surveillance data and allow deeper insights into epidemiological changes, and new diagnostic methods will be considered for rapid identification and the containment of *C. difficile* spread.
Prof. Dr. Maurizio Averna

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
