

# Special Issue

## *Clostridium difficile*

### Message from the Guest Editor

This Special Issue, entitled "*Clostridium difficile*", aims to present recent research on various aspects of *C. difficile*, including ecology, virulence, and infection course under in vivo and in vitro conditions. Some of its central topics include but are not limited to *C. difficile* colonization, interaction with the gut microbiota and the host, immune response, strategies to reduce *C. difficile* infections in humans and animals, and problems of antibiotic resistance and zoonosis. Research articles, review articles, and short communications are welcome. We look forward to publishing your work.

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Virology)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
