

# Special Issue

## Current Prokaryotic Genome Engineering

### Message from the Guest Editors

The aim of this Special Issue is to provide a snapshot of current prokaryotic genome editing. Descriptions of new techniques or applications of existing methods for new purposes or on novel microbial strains are all welcome. Since both the toolbox and the investigated biological questions link bacterial and bacteriophage gene editing, we take these two topics as one whole. As of the Special Issue, we invite you to submit research articles, short communications, and review articles concerning the modification of eubacterial, archaeal, or bacteriophage genomes.

---

### Guest Editors

Dr. Tamás Fehér

Synthetic and Systems Biology Unit, Institute of Biochemistry, Biological Research Centre, Szeged, Hungary

Dr. Antonia P. Sagona

School of Life Sciences, University of Warwick, Gibbet Hill Campus, Coventry CV4 7AL, UK

---

### Deadline for manuscript submissions

closed (30 June 2023)

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

---

### Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
