

Special Issue

Soil Microbial Communities and Ecosystem Functions, 2nd Edition

Message from the Guest Editor

In this Special Issue of *Microorganisms*, we invite authors to send their contributions concerning any aspect that could affect the relationship between microbial organization and soil functionality: metrics of analysis, spatial scale or different environmental conditions, as well as the influence of perturbations on the above-mentioned relationships. For this Special Issue, we welcome original research papers, review articles, and short communications. Research areas may include, but are not limited to, ecology, microbiology, and biogeography. I look forward to receiving your contributions.

Guest Editor

Prof. Dr. Efimia M. Papatheodorou

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
