

Special Issue

Molecular Characteristics, Pathogenicity and Antimicrobial Resistance of Enterobacteriaceae

Message from the Guest Editor

Enterobacteriaceae are important zoonotic foodborne bacteria capable of endangering human health and useful indicator of hygiene. This Special Issue proposes to build upon one more piece of the molecular characteristics, pathogenicity and antimicrobial resistance in Enterobacteriaceae, through attracting and agglutinating the new data, updates, opinions, points of view and scientific perspectives of Enterobacteriaceae.

Guest Editor

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
