

# Special Issue

## Dickeya and Pectobacterium: Ecology, Pathology and Plant Protection

### Message from the Guest Editor

Pectinolytic enterobacteria *Dickeya* and *Pectobacterium* represent a threat for plant and seed production and trade around the world. This Special Issue offers the opportunity to share recent advances in ecology, evolution, taxonomy and pathogenesis of bacteria of the *Pectobacterium* and *Dickeya* genera. This Special Issue will also consider advances in diagnosis and biocontrol approaches and plant breeding to limit propagation of these pathogens and their damage on plants.

### Guest Editor

Dr. Denis Faure

Institute for Integrative Biology of the Cell, Université Paris-Saclay, CEA, CNRS, 91198 Gif-sur-Yvette, France

### Deadline for manuscript submissions

closed (30 June 2021)

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
