

Special Issue

One Health Research on Infectious Diseases

Message from the Guest Editors

The advent of the SARS-CoV-2 pandemic and other emerging RNA viruses already known in human pathology has immensely increased the research attention given to these viruses, especially SARS-CoV and MERS-CoV. Often, the coronavirus environmental reservoir is represented by different animal species, especially bats; humans are the final hosts of these viruses and often become infected due to spillover events. Therefore, given the presence of coronaviruses in animal hosts and their ability to spill over, it is essential to adopt a One Health approach. This Special Issue aims to collect works concerning the study of emerging viruses in both humans and animals. We welcome articles that explore both diagnostic and research aspects, with a particular emphasis on works based on testing methods for infectious agents.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
