

# Special Issue

## State-of-the-Art Food Microbiology in Korea (2023, 2024)

### Message from the Guest Editor

This Special Issue aims to provide a comprehensive overview of state-of-the-art food microbiology in Korea. We encourage South Korean researchers from related fields to contribute papers highlighting the latest developments in food microbiology, or to invite relevant experts and colleagues to do the same. The Special Issue will publish full research articles and comprehensive reviews.

### Guest Editor

Prof. Dr. Changsun Choi

Department of Food and Nutrition, Chung-Ang University, Anseong 17546, Republic of Korea

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
