

Special Issue

Recent Advances in Coxsackievirus Infections: Epidemiology, Pathogenesis and Methods for Control and Prevention

Message from the Guest Editors

This Special Issue encourages researchers worldwide to present their latest research on CV epidemiology, virulence, cellular and molecular mechanisms involved in CV pathogenesis, and the new antiviral strategies to control CV infections.

We look forward to receiving your contributions to this Special Issue in the form of original research articles, review articles, and small reviews, including communications and opinions regarding all aspects of coxsackievirus molecular biology, epidemiology, diagnosis, virulence, pathogenesis, and future strategies to control these viruses including vaccines and antiviral molecules.

Guest Editors

Prof. Dr. Jawhar Gharbi

Department of Biological Sciences, College of Science, King Faisal University, Al-Ahsa 31982, Saudi Arabia

Prof. Dr. Didier Hober

Laboratoire de Virologie ULR3610, Université Lille et CHU Lille, 59000 Lille, France

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
