Epidemiology and Diagnosis of Invasive Fungal Infections

Message from the Guest Editors

Fungal infections are assuming higher relevance, and many factors have been contributing to the emergence of invasive fungal infections, including the HIV epidemic, the rise in the number of patients receiving a growing array of immunosuppressive therapies, and the increasing number of persons who have frequent nosocomial exposure and interventions.

The emergence of new fungal pathogens and the resurgence of mycotic diseases that had previously been uncommon constitute a serious and growing public health problem.

All these issues open the door to a new world of possibilities yet to be investigated. As result, clinicians and microbiologists need to be familiar with the epidemiology of fungal infections, as well as their clinical presentation, methods for diagnosis and current treatment choices.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
