

Special Issue

Epidemiological and Immunological Studies of Emerging Infectious Diseases

Message from the Guest Editor

In the face of an ever-evolving microbial landscape, the emergence of infectious diseases presents a persistent and formidable challenge to global public health. This Special Issue is dedicated to unraveling the intricate interplay between epidemiological dynamics and immunological responses in the context of emerging infectious diseases. By exploring the latest research findings, methodologies, and advancements, this Special Issue aims to provide a comprehensive understanding of the complex mechanisms governing the spread and control of emerging pathogens. Emerging infectious diseases, characterized by their sudden appearance or re-emergence in human and animal populations, demand a multidisciplinary approach for effective management. **Keywords:** emerging infectious diseases; spread and control; resistance; surveillance

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
