## Latest Review Papers in Virology 2024

### Message from the Guest Editor

This Special Issue is the continuation of our previous edition entitled "[Latest Review Papers in Virology 2023](#)". This Special Issue aims to collect high-quality review papers in all fields of virology. We encourage researchers from related fields to contribute review papers that highlight the latest developments in virology, or to invite relevant experts and colleagues to do so. Full-length comprehensive reviews are preferred.

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.
