

Special Issue

Advances in Bovine Anaplasmosis

Message from the Guest Editor

Bovine anaplasmosis, primarily caused by *Anaplasma marginale*, poses significant challenges to cattle health and the livestock industry. Research in this field has evolved to address various aspects of the disease, including its etiology, epidemiology, diagnostics, treatment, prevention, and socio-economic impacts. Recent advances in the understanding, diagnosis, treatment, and prevention of bovine anaplasmosis have contributed to better management practices. Despite the progress made in the research in the field, there are key areas where action is needed. For this Special Issue, we welcome contributions of original articles, review papers, and communications, which will help enhance the understanding, prevention, and control of this disease, especially in vaccine development, understanding pathogenesis, diagnostics improvement, and vector control strategies.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
