

Special Issue

Lactobacillus Plantarum and Related Study

Message from the Guest Editors

Dear Colleague, Many strains of *L. plantarum* have exhibited health-promoting effects covering the aspects of gut health, metabolic disorders, immunomodulation, and mental health. They warrant the relevance of this species as a distinctive candidate of probiotics for more research. The scope of this Special Issue on

“*Lactiplantibacillus plantarum* and Related Studies” will serve as an advanced forum to bring together the latest research related to *L. plantarum*, including, but not limited to, basic research, application in any biotech and food industry, health-promoting effects on humans or animals, mechanisms of physiological actions, and characterization of novel strains with novel functionalities. As of the Special Issue, we invite you to submit research articles, review articles, or short communications related to the abovementioned research areas about this remarkable lactobacillus.

Keywords: *Lactiplantibacillus plantarum*; probiotics; postbiotics; psychobiotics; health benefit; human trial; animal health; host interaction; genetic study; functional food; fermented foods; bioactive molecule; metabolite

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
