## Microbe-Host Interaction in Health or Disease in Aquaculture Species

### Message from the Guest Editors

Aquaculture, the farming of aquatic organisms, plays a vital role in meeting the ever-expanding demand for seafood worldwide. As the industry continues to expand, it faces numerous challenges, including maintaining the health and well-being of cultured species. One crucial aspect that significantly influences the success of aquaculture operations is the interaction between diet and the host species.

This Special Issue will be composed of, but not limited to, microbiota studies and its modulation via feed formulation/functional feeds, dietary impacts on growth and development, immune modulation through diet, and mucosa health, including the gut, gills and skin. These studies shed light on the mechanisms that underlie the diet–host interaction and provide valuable information for the development of sustainable aquaculture practices.

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
