

Special Issue

Overviews of Clinical Microbial Infection

Message from the Guest Editor

The Special Issue "Overviews of Clinical Microbial Infection" highlights clinically relevant critical infections, including drug-resistant bacterial infections, bloodstream infections, viral infections, etc. The research presented in this issue will provide valuable insights into the epidemic and the treatment and prevention of critical infectious diseases, including healthcare-associated infections, and highlight the need for further research into this important area. This Special Issue aims to collect high-quality manuscripts (research articles, case reports, short communication, and reviews). We look forward to receiving your important contributions.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
