

Special Issue

Emerging Fungal Pathogens, Diagnostic Innovations, and Clinical Strategies in the Era of Antifungal Resistance

Message from the Guest Editor

This Special Issue focuses on the growing threat of emerging fungal pathogens, as well as well-known and common fungal species that continue to cause diseases. It highlights the importance of innovative diagnostics and clinical strategies to improve patient outcomes and to contain antifungal drug resistance. Researchers and clinicians are invited to submit contributions that address current challenges and advances in this critical field. We are pleased to invite you to contribute original research articles, reviews, and case reports that address key challenges and opportunities in this important evolving field. Your work will help shape a more effective and informed response to one of today's most pressing medical concerns. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
