SARS-CoV-2 Systemic Effects: New Clues

Message from the Guest Editors

To date, much discussion has been had on SARS-CoV-2 lung infection associated with COVID-19 onset. Although the respiratory tract represents the main site of entry for the virus, even more evidence underlines the existence of an important systemic effect caused by the primary infection. In particular, the involvement of different body compartments, such as the gastrointestinal tract, the cardiovascular system and the reproductive tract, appears even more clear. The aim of this Special Issue of *Microorganisms* is to collect articles to provide a deeper knowledge on the systemic effect due to COVID-19. Manuscripts covering all aspects of research relating to SARS-CoV-2 tissutal infection and its effect on the host are welcome, including work from an applied angle—such as novel diagnostics—through to more fundamental questions relating to the biology of the virus and its pathogenesis and epidemiology.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
