

Special Issue

Advances in Oral Microorganisms and Biofilms

Message from the Guest Editor

This Special Issue "Advances in Oral Microorganisms and Biofilms" focusses on publishing data related to oral microorganisms and biofilms in periodontal and peri-implant infections, in dental caries and endodontic infections, as well as other oral diseases. The aim is to present research outcomes related to the role and impact of oral microorganisms and biofilms, as well as therapeutical strategies and new developments in reestablishing dysbiotical microbial changes and resolution of inflammation. We invite you to submit research articles, review articles, communications, and perspective related to oral microorganisms and biofilms.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
