

Special Issue

Evolving Strategies against Antibiotic Resistance in Gram-Positive Pathogens: The Never-Ending Story of Multiple-Drug Resistant Staphylococci and Enterococci

Message from the Guest Editors

This Special Issue will focus on the phenotypic and molecular strategies adopted by staphylococci and enterococci that allow for fast adaptation, the development of multidrug resistance, and refractoriness to effective therapy. Knowledge in this field will help in understanding the emergence of pathogenic clones and the genetic variation underlying clinically relevant changes, as well as in pinpointing novel targets for antibiotics, vaccines or immunotherapy.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
