

# Special Issue

## Animal Tuberculosis Due to *Mycobacterium tuberculosis* complex Members

### Message from the Guest Editors

For this Special Issue "Animal Tuberculosis Due to *Mycobacterium tuberculosis* complex Members", we seek original research papers dedicated to animal tuberculosis (TB) due to the *Mycobacterium tuberculosis* complex (MTBC) organisms, focused on studies of multi-host reservoirs and their roles in the emergence, transmission and/or maintenance of disease in livestock. System-based studies that integrate host/pathogen research with the epidemiology and population dynamics of the disease, its pathogenesis and animal farming practices including farmer behavior are also welcome.

### Guest Editors

Dr. María Laura Boschioli

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
