

Special Issue

Antiviral Research

Message from the Guest Editor

This Special Issue of *Microorganisms* will be dedicated to the following themes: identification of new antiviral molecules both from natural and synthetic origin, preclinical studies of antivirals previously identified, repurposing of drugs as antivirals, challenges and tools for antiviral discovery, reviews of antivirals available for a specific viral pathogen or reviews of a specific class of antivirals (i.e., nucleoside analogues, immunomodulatory molecules, fusion inhibitors)

Guest Editor

Dr. Valeria Cagno

Department of Microbiology and Molecular Medicine, University of Geneva Medical School, 1205 Geneva, Switzerland

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
