Special Issue

Bacillus: Molecular Considerations

Message from the Guest Editor

The bacteria that constitute the genus *Bacillus* are among the most ubiquitous in nature and diverse physiologically. The majority of *Bacillus* species studied, to date, are beneficial to various commercial and industrial endeavors, medicine and pharmaceutics and to agriculture. Indeed, some are quite helpful nutritionally, serving as food supplements and probiotics. Others such as *B. cereus* and *B. anthracis* are potential human and animal pathogens. The objective of this Special Issue of *Microorganisms* is to present some of the latest molecular experimental approaches for studying various *Bacillus* species and call attention to the benefits and utility of this group of bacteria. Original research articles, as well as review articles, are invited.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich
Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
