

# Special Issue

## Characterization, Identification, and Systematics of Clinically Relevant Bacteria

### Message from the Guest Editors

This special issue covers Systematics, Characterizations and identification of bacteria isolated from human clinical samples. We invite you to submit papers describing or questioning the systematics of species or genera of bacteria isolated from clinical samples, as well as the characterization of these bacteria, including traits of antimicrobial resistance and virulence, and also how the bacteria may be identified or classified in a clinical laboratory using phenotypic, genotypic or proteotypic methods, including WGS and Sanger, as well as mass spectrometry-based methods, including MALDI TOF MS.

### Guest Editors

Dr. Liselott Svensson Stadler

1. Department of Infectious Diseases, Institute for Biomedicine, Sahlgrenska Academy, University of Gothenburg, Gothenburg, Sweden
2. Department of Clinical Microbiology, Sahlgrenska University Hospital, Gothenburg, Sweden

Dr. Roger Karlsson

1. Department of Infectious Diseases, Institute for Biomedicine, Sahlgrenska Academy, University of Gothenburg, Gothenburg, Sweden
2. Department of Clinical Microbiology, Sahlgrenska University Hospital, Gothenburg, Sweden

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
