## Emerging Infectious Diseases and Strategies for Their Prevention and Control

### Message from the Guest Editors

We are pleased to invite you to submit articles related to the epidemiology, diagnosis, treatment and control of emerging and re-emerging infectious diseases, focusing on recent advances in the aforementioned fields. Original research articles and reviews are welcome. Research areas may include (but not limited to) the following: new pathogen identification; diagnosis and detection; outbreak investigation and management; infection prevention and control; vaccination; education and training. We look forward to receiving your contributions.

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
