

# Special Issue

## Fungal and Polymicrobial Biofilms

### Message from the Guest Editor

The Special Issue "Fungal and Polymicrobial Biofilms" aims to understand biofilms formed by fungal species, with an emphasis on those species that cause infection in humans. This includes but is not limited to *Candida albicans*, one of the major fungal biofilm-formers in humans, as well as interacting fungal and bacterial species that together form polymicrobial biofilms. I would like to invite you to submit research articles, review articles, and short communications on topics pertaining to fungal biofilms and polymicrobial biofilms.

### Guest Editor

Dr. Clarissa J. Nobile

Department of Molecular and Cell Biology, University of California  
Merced, Merced, CA 95343, USA

### Deadline for manuscript submissions

closed (28 February 2022)

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
