Special Issue

Gram Positive Toxins Producing Organisms

Message from the Guest Editors

The aim of this issue is to provide a collection of articles that highlights research on bacterial toxins. The editors chose to focus this issue on Gram positive bacterial toxins. Submissions reflecting all aspects of toxin research are welcome from applied (novel diagnostics. countermeasures, vaccines) to more basic areas related to the biology of the toxin, genomics, and pathogenesis. Gram positive toxins include, but are not limited to, tetanus toxin, botulinum toxins, staphylococcal toxins, diphtheria toxin, streptococcal toxins, Listeria toxin, anthrax toxins, Bacillus cereus toxins, pneumolysin, enterococcal toxins, and other clostridial toxins (e.g., perfringolysin O). Each of these toxins has a unique story to tell but needs a storyteller. We hope you will be able to contribute to this special issue on Gram positive toxins.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
