

Special Issue

Innovative Therapeutic Strategies for Neglected and Emerging Disease

Message from the Guest Editors

As a of this Special Issue, I invite you to submit research articles, review articles, and short communications related to human systemic protozoal infections that are the cause of different neglected and emergent diseases. This topic is broken down into three subtopics with the aim to discuss the epidemiology, diagnosis, treatment, and prevention of these diseases.

- Intestinal protozoa: *Cryptosporidium*, *Eimeria*, *Coccidia*, *Isospora*, *Giardia*, *Entamoeba*,
- Blood protozoa: *Plasmodium*, *Babesia*, African *Trypanosomes*,
- Systemic protozoa: *Toxoplasma*, *Neospora*, *Sarcocystis*, *Trichomonas*, *Trypanosoma cruzi*, *Leishmania*.

This Special Issue will present recent updates on emerging and neglected infectious diseases organized in the three subtopics mentioned above and highlight the scope, dynamics, and advances in infectious disease management. The Special Issue will bring together different approaches and innovative discoveries in different diseases to look for solutions to the current problems of infectious diseases.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
