Special Issue

Microbiome and Lung Disease: Not So Sterile Anymore!

Message from the Guest Editor

Our understanding of microbial–host interactions, especially in the airway, has evolved significantly over the last ten to fifteen years. We now understand that the lung is not the sterile environment it was originally thought to be. A complex interaction between resident, not just transient, microbes including bacteria, viruses and fungi helps in shaping respiratory function and immune tone. This respiratory microbiome contributes to defense against pathogenic microbes, supports the function of the epithelial barrier and can influence the function of innate and adaptive immune cells. Increasingly, modifications to the airway microbiome have been linked to the development of allergic airway diseases, chronic and frequent exacerbations and rapid decline of lung function. Keywords: microbiome; respiratory disease; immunology; metabolome

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich
Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
