

Special Issue

Microorganisms in Food – Two Sides of One Story

Message from the Guest Editors

Microorganisms exert both beneficial and deleterious effects on food products, and the studies in the area of food microbiology are constantly evolving. On the one hand, in response to consumer preferences there are new products obtained with the participation of microorganisms. On the other, products and the food environment are niches that can be contaminated by microorganisms, both well-known and new species of bacteria, yeasts and molds. This Special Issue of *Microorganisms* will be dedicated to the (1) use of microorganisms in food production (traditional and novel products); (2) food contamination by well-known and new species of bacteria, yeasts, and molds; (3) characteristics of microorganisms in food industry; (4) strategies of food preservation and antimicrobial agents with potential usage in food industry. We would like to invite researchers to submit both research or review articles to this Special Issue of *Microorganisms*.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
