

Special Issue

Molecular Biology of Hepatitis B Virus—from Basic Concepts to Therapeutic Targets

Message from the Guest Editors

The aim of this Special Issue is to gather the most updated information regarding the molecular biology of HBV and to connect the dots tying this information to present and future targets for curative anti-HBV therapies. We would like to invite researchers to submit their research or review articles on HBV concerning different aspects of its life cycle, with emphasis on exploiting basic concepts in HBV molecular virology for better therapeutic tools.

Guest Editors

Dr. Amir Shlomai

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
