

# Special Issue

## Monkeypox—Current Knowledge and Future Perspectives

### Message from the Guest Editors

Monkeypox has been described originally as a pox-like viral disease found in captive monkeys. Although we are not completely unshielded against monkeypox, as both vaccines and antiviral drugs are available, in light of the ongoing global crisis caused by SARS-CoV-2—also a virus of animal origin—concerns may well arise if the monkeypox virus continues to spread. This Special Issue of *Microorganisms* aims to collect existing scientific data and new information related to monkeypox that may help us to understand the current situation and prepare for a possible future where an old-new poxvirus disease might become part of our everyday lives. Submissions consisting of reviews, original research articles and communications discussing any aspect of monkeypox disease are encouraged from experts around the globe.

### Guest Editors

Dr. Krisztián Bányai

Veterinary Medical Research Institute, Budapest, Hungary

Prof. Dr. Jakab Ferenc

National Laboratory of Virology, University of Pécs, Pécs, Hungary

### Deadline for manuscript submissions

closed (30 June 2024)

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
