

Special Issue

New Perspectives in Controlling the Spread of Multi-Drug Resistance Organisms (MDROs)

Message from the Guest Editor

In this issue, we propose to address important questions that would allow us to consider MDRO control in our hospitals differently, such as:

- What are the lessons to be drawn from the COVID-19 pandemic and the spread of MDRO?
- Are MDRO organisms the same or different in terms of risk?
- Are contact isolations mandatory to control the spread of MDRO?
- Are adverse events related to contact isolation?
- What is the role of microbiota in acquisition and clearance of MDRO?
- Is it necessary to control the risk related to the environment? If so, when and how?
- Is decolonisation useful? When? For what organisms? How?

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
