

Special Issue

One Health: Chlamydiae and Chlamydia-Likes in Humans, Animals and the Environment

Message from the Guest Editors

One health is the collaborative effort of multiple disciplines working locally, nationally and globally to attain optimal health for people, animals and the environment. The current Special Issue has a focus on Chlamydiae in the environment and in animals alone or preferentially in relation to human infection and disease. Knowledge of epidemiology and association with bacterial infections can potentially inform appropriate action as these bacterial infections are treatable, so novel case reports are also included in this Special Issue. Finally, since large consortia and projects on Chlamydiae and Chlamydia-likes are funded by the European Union and other continents, we encourage researchers and clinicians to prepare original articles describing the results obtained through the activities of these consortia.

Guest Editors

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
