

Special Issue

Plant Pathogenic Oomycetes

Message from the Guest Editor

Plant pathogenic oomycetes cause billions of dollars of losses each year and some threaten natural ecosystems in their invasive range. At the same time, control measures are often insufficient, their diversity is still largely unknown, and new pathogens are constantly emerging. The scope of the Special Issue on Plant Pathogenic Oomycetes is to collect significant advances in all areas of research on plant pathogenic oomycetes. Both original research and review articles are welcome, but please contact the first, if you plan to submit a review manuscript. Manuscripts dealing with single-gene phylogenies or descriptions of single species will only be acceptable in rare cases. Please contact the guest editor if in doubt.

Guest Editor

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
