

Special Issue

Adaptation of Pathogenic Microbes to the Host Environment

Message from the Guest Editor

In this Special Issue of *Microorganisms*, dedicated to adaptation to the host environment, we invite you to send in your contributions concerning any aspects related to the adaptation of pathogenic microbes to the host environment, from avoidance or tolerance of the immune system and the emergence of antimicrobial resistance, to changes in the genome, epigenome, signaling or physiology of species, and from fundamental to applied aspects.

Guest Editor

Dr. Kylie Boyce

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
