

# Special Issue

## The Structure and Properties of Microbial Enzymes

### Message from the Guest Editor

The scope of this special issue is to collect articles and reviews on structure-function relationships in microbial proteins. The contributions can be on evolution of protein families, specific features of new structures, engineering of protein stability or catalytic properties. Works focused on proteins involved in virulence are also welcomed.

### Guest Editor

Prof. Dr. Stephane Rety

Laboratory of Biology and Modeling of the Cell, Ecole Normale Supérieure de Lyon, Lyon, France

### Deadline for manuscript submissions

closed (15 August 2023)

## About the Journal

### Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

#### Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
