Prosthetic and Bone Infections: A Multidisciplinary Approach

Message from the Guest Editors

This Special Issue, “Prosthetic and bone infections: a multidisciplinary issue“, aims to collect data and experience from clinical and pre-clinical activities arising from the management of patients with bone, joint, periprosthetic or hardware-related infections. Special attention will be paid to the issue of multidisciplinary teamwork in the management of these patients. We are pleased to invite you to participate in the production of this Special Issue. We strongly believe that only the increased dissemination of knowledge can contribute to the optimisation of the management of such complex matters. In this Special Issue, original research articles and reviews are welcome. Research areas may include, but are not limited to, the following:

- Orthoplastic approach;
- Prosthetic joint infection;
- Diagnosis and management of PJI;
- Chronic osteomyelitis;
- Antibiotic therapy in bone and joint infections.

We look forward to receiving your contributions.

Keywords: bone infections; periprosthetic joint infections; infectious diseases; bone reconstruction; multidisciplinary surgery; multidisciplinary approach

Guest Editors

Dr. Andrea Sambri

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the second half of 2025).
