

Special Issue

An Update on Bacillus

Message from the Guest Editor

This Special Issue of *Microorganisms* aims to provide a scientific platform for scientists performing fundamental, applied and translational research related to the *Bacillus cereus* group species. This Special Issue will include original studies, reviews and method papers on these *Bacillus* pathogens related to their genomics, gene regulation, sporulation, exotoxins, structural biology, bacteria–host interactions, animal models, vaccines, ecology, epidemiology, etc. In addition, studies on rapid diagnostics, decontamination, therapeutics of the *Bacillus*-related diseases and case reports are also welcome.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
