

Special Issue

Zoonotic Parasites: *Toxoplasma gondii*, *Trichinella* spp., and *Toxocara* spp.

Message from the Guest Editor

In the Special Issue of *Microorganisms*, Zoonotic Parasites: *Toxoplasma gondii*, *Trichinella* spp., and *Toxocara* spp., we aimed to collect the latest research related to all aspects of these zoonotic parasites. We call for different types of articles (original research manuscripts, short communications, review papers, etc.). Topics of interest include (but are not limited to) epidemiology, ecology, evolution, host-parasite interaction, transmission/natural cycles, pathogenesis and immunity, relationship with non-communicable diseases (e.g., neurological, psychiatric, allergic, etc.), vaccination, treatment, and clinical parasitology of medical and veterinarian relevance.

About the Journal

Message from the Editor-in-Chief

"Microorganism" merges the idea of the very small with the idea of the evolving reproducing organism is a unifying principle for the discipline of microbiology. Our journal recognizes the broadly diverse yet connected nature of microorganisms and provides an advanced publishing forum for original articles from scientists involved in high-quality basic and applied research on any prokaryotic or eukaryotic microorganism, and for research on the ecology, genomics and evolution of microbial communities as well as that exploring cultured microorganisms in the laboratory.

Editor-in-Chief

Dr. Nico Jehmlich

Department of Molecular Toxicology, UFZ-Helmholtz Centre for
Environmental Research, 04318 Leipzig, Germany

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, CAPlus / SciFinder, AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Microbiology) / CiteScore - Q1 (Microbiology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.2 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
