

## Special Issue

# Microplastics in Aquatic Environments

### Message from the Guest Editors

The presence of microplastics in aquatic environments is a global threat. Once microplastics (MPs) are released into aquatic environments, these contaminants enter the water, and microplastics enter the food chain and can cause serious health risks. An assessment of ecological risks is essential. This Special Issue was created to fill in knowledge gaps on various sources, the transportation of microplastics in the water environment, the effects on the environmental and the health of biota and humans, global policy frameworks, and finally control strategies that are used to prevent microplastics from being released in the aquatic environment.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Nicolas Kalogerakis  
School of Chemical & Environmental Engineering, Technical University  
of Crete, Chania, Greece

---

#### Author Benefits

##### Open Access:

free for readers, with article processing charges (APC) paid  
by authors or their institutions.

##### High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO,  
and other databases.

##### Journal Rank:

JCR - Q1 (Environmental Sciences) / CiteScore - Q1  
(Environmental Science (miscellaneous))
