# Application of Deep Learning Approaches in Rocks Hyperspectral Imaging

Guest Editors:

#### Prof. Dr. Youhei Kawamura

Division of Sustainable Resources Engineering, Hokkaido University, Kita 13, Nishi 8, Kitaku, Sapporo 060-8628, Japan

#### Dr. Hisatoshi Toriya

Department of International Resource Sciences, Akita University, 1-1 Tegatagakuen, Akita 010-8502, Japan

Deadline for manuscript submissions: closed (25 March 2022)

### Message from the Guest Editors

Dear Colleagues,

Spectrum analysis has been used in various fields. In the mining industry, technologies have been developed that utilize the multispectral data obtained from satellites for exploration. On the other hand, in recent years, the technological development of hyperspectral cameras has been remarkable, and it has become possible to easily measure spectra of many wavelengths in the field. While hyperspectral data contain a lot of information, their analysis and interpretation are complicated. Therefore, a methodology for more effectively analyzing hyperspectral data by utilizing deep learning, which is one of the most remarkable artificial intelligence technologies in the field of information engineering, is attracting attention. This Special Issue features research that utilizes this methodology to determine the type and properties of rocks.

### Message from the Editor-in-Chief

*Minerals* welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

# **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions. **High Visibility:** indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases. **Journal Rank:** JCR - Q2 (*Mining & Mineral Processing*) / CiteScore - Q2 (*Geology*)
