Deadline for manuscript  
submissions:

**closed (10 March 2023)**

### Message from the Guest Editor

Dear Colleagues,

Potential field data are widely used in the search for new mineral deposits. A large number of semiautomatic interpretation techniques are used to provide initial estimates of source parameters, such as the location, depth, dip, susceptibility, etc. These initial estimates are then refined by forward and inverse modeling. As well as including case histories, this Special Issue will look at new developments of techniques in all of these areas of research.

Prof. Gordon Cooper

University Bayreuth, D-95440  
Bayreuth, Germany

## Message from the Editor-in-Chief

*Minerals* welcomes submissions that report basic and applied research in mineralogy. Research areas of traditional interest are mineral deposits, mining, mineral processing and environmental mineralogy. The journal footprint also includes novel uses of elemental and isotopic analyses of minerals for petrology, geochronology and thermochronology, thermobarometry, ore genesis and sedimentary provenance. Contributions are encouraged in emerging research areas such as applications of quantitative mineralogy to the oil and gas, manufacturing, forensic science, climate change, geohazard and health sectors.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), GeoRef, CaPlus / SciFinder, Inspec, Astrophysics Data System, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Mining & Mineral Processing*) / CiteScore - Q2 (*Geology*)
